

## CCC District Plan Requirement

1. Check the planning maps to locate the proposed building and determine its zoning from the new district plan.

2. Use the planning maps to confirm whether the proposed building has any special feature or designation on it. If the site classified as *“Proposed Stage one, Stage two and Stage three areas”* on the planning maps, original city plan needs to be used for determining its zoning and to check city plan requirements.

## New District Plan

## Original City Plan
